

The EHD9000 Extra Heavy-Duty Door Closer by BEST

A Closer You Can Count On

Extra Heavy-Duty – It's in the Name

If a door closer fails, it can be more than a nuisance. It could be a safety issue, waste energy or impact access. It can cause headaches for maintenance, create a less secure environment or slam doors shut with too much force.

The BEST EHD9000 is built to perform in even the highest traffic area and designed to be the most reliable, durable and rugged door closer in the industry. The closer is purpose built to address issues common in other closers so your building remains safe and doors operate as intended. It's the last closer you'll ever need.

Front-facing spring-size indicator and adjustment points are easy to read and reach

You'll never have to remove the closer or door to adjust

Better From the Start

The EHD9000's single-piece cast iron design is quality you can feel. Expertly cast in Germany, it's sturdy with no seams – unlike competitors who use a threaded, two-piece construction with a steel tube – and designed to work from day one to decades down the road.

- Rugged reliable single-piece cast iron construction
- Durable design meant to last and perform consistently over the years

Many door closers require adjustments before installation. If you forget, then finish the install without adjusting, you may have to remove the whole closer and do it over again. The EHD9000 makes it easier for you to install without worry and maintain long after installation.

Everyday Operation Without the Adjustments

High traffic and changing temperatures can take a toll on closer functionality. BEST designed the EHD9000 to automatically adjust so you get consistent operation open after close after open after close.

Now, whether the door connects two rooms or separates the interior from the outdoors, the EHD9000 fixes this problem by automatically adjusting itself to maintain your ideal operation settings.

Featuring self-regulating valves, the EHD9000 does not require frequent tinkering, significantly reducing adjustment frequency and maintenance woes while ensuring your building is safe and your doors are operating as intended.

Confidence From Day One

BEST understands the pains of leaky or faulty door closers – and the exhausting process of constantly fixing them. That’s why we listened to our partners and maintenance professionals nationwide. Once the EHD9000 is installed, you will rarely, if ever, have to revisit it for adjustments, breakage or leaks. Here’s why:

Single-Piece Construction
The EHD9000 is cast iron and made to last. It’s designed for reliability, durability and quality for years after installation

Expertly Cast in Germany
High-quality and rigorously tested materials make sure the EHD9000 is ready for even the heaviest traffic

Self-regulating valves and our **proprietary ester oil** allow the EHD9000 to automatically adjust to changes in temperature to maintain ideal closing speed, backcheck and delayed action settings

Even the EHD9000 cover was built to last.
You’ve seen coverless door closers. Though we like the look of our design, those in your building may not. To reduce the chance of our cover falling off, the EHD9000 has dual-clamp attachment points for a strong, secure fit on both ends of the closer.

Nothing Closes like the BEST EHD9000

Unmatched Versatility

When it comes to finding the right door closer for your building, BEST is closing the door on the competition. The EHD9000 allows customization of color, arm, and utilities to ensure your doors work and look as intended every day. Featuring non-handed design with backcheck and advanced variable backcheck as standard functions, the EHD9000 boosts flexibility, so you always have the right closer on hand. With one of the largest arm ranges in the market, the EHD9000 offers a solution for virtually any application.

You Can't Get Better Than BEST

Along with BEST's other institutional products such as locks and exit devices, the EHD9000 expands our portfolio in commercial, healthcare, education and government applications and gives you a comprehensive catalog of premium products.

Our door hardware and access solutions are trusted around the world and in many applications. We're always innovating for you, our partners and customers, and the EHD9000 is the most recent example of our commitment to safe, secure and desirable products.
