626W: Weatherized Finish by BEST

Preserve performance and aesthetics over the long term.

BEST Precision 626W finish protects exit devices and extends product life. Conforming to ANSI/BHMA guidelines, our 626W finish is a true architectural finish—chrome plating over brass for each exterior component—not just a color match. Because we don't compromise on materials, our 626W-protected exit devices resist rust, corrosion, and salt air over the full life of the product. Available on all Precision 2000 Series exit devices, PRECISION's 626W finish provides the ideal solution for applications like natatoriums, water treatment facilities, and exterior gates. For protection from environmental factors over the long term, choose the true 626 finish—PRECISION's 626W.

Brass construction
underneath for durability

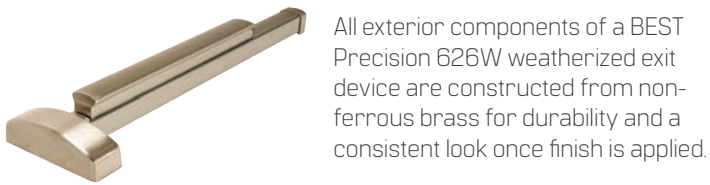

Strength by design. Simply BEST Precision

The premium finish for performance and durability on exterior doors..

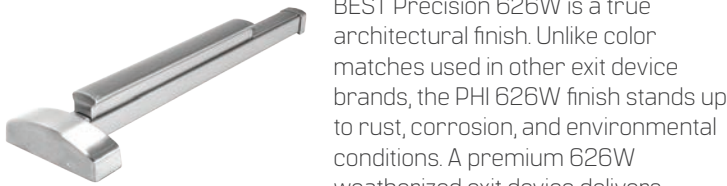

Our 626W weatherized finish combines security with durability and long-lasting aesthetic appeal. BEST Precision constructs all exterior components from brass and coats each one with 626W for a consistent look and performance. With greater durability than non-architectural finishes, 626W provides lower maintenance and longer product life—and the highest value for exterior applications.

BEST Precision 626W Specifications	
Certifications	Meets ANSI/BHMA A156.18-2012 guidelines for true architectural finish MIL-STD-810G 510.6 Sand and Dust MIL-STD-810G 521.4 Icing/Freezing Rain MIL-STD-810G 509.6 Salt Fog
Specifications	Formulated to withstand environmental challenges All exterior components constructed from brass All exterior components plated with satin chrome
Availability	Exit Devices: Precision 2000 Series Exit Trims: 4900 Series; 1700 Series (A and C grips)
Warranties	Three-year finish warranty

626W Features and Benefits
<ul style="list-style-type: none"> • True architectural finish. BEST Precision 626W finish meets ANSI requirements for a true architectural finish—not just a color match, but chrome plated over brass components. • Premium weatherized option. The premium 626W finish option provides a truly weatherized finish to protect exit devices in exterior applications from environmental conditions, rust, corrosion, and salt. • Consistent look. All exterior components of BEST Precision 626W weatherized exit device are constructed from brass and treated with 626W finish. This gives a consistent aesthetic to the device as well as ensuring long-lasting performance. • Greater durability. Constructed of brass and plated with our premium 626W finish, BEST Precision weatherized exit devices resist damage and maintain aesthetic appeal throughout the life of the product. • Higher value. From reduced maintenance to longer product life, BEST Precision exit devices, weatherized with our premium 626W finish, deliver the highest value for exterior applications. • Weatherized electrical options. The 626W finish can be added to additional components, with options including weatherized touchbar monitoring switch (WTS), weatherized touchbar monitoring double switch (WTDS), and weatherized exit alarm (WALW).

All exterior components of a BEST Precision 626W weatherized exit device are constructed from non-ferrous brass for durability and a consistent look once finish is applied.

BEST Precision 626W is a true architectural finish. Unlike color matches used in other exit device brands, the PHI 626W finish stands up to rust, corrosion, and environmental conditions. A premium 626W weatherized exit device delivers uncompromised performance and aesthetics for the life of the product.

Since each exterior-facing surface is made of brass and coated with 626W chrome plating, the entire device is weather-resistant.

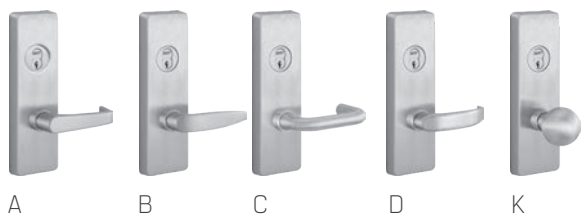

Also Available:

WTS/WTDS - Weatherized Touch bar Switch

WALW - Weatherized Alarm Option (Hardware)

NOTE: Non-weatherized electrical options are not suitable for exterior applications

Available Exit Trims

For weatherized exit devices, choose BEST Precision 626W—the long-lasting quality, aesthetic, and security you need for exterior applications.
